Expert Services

Consultancy

The Filament Strategy team are genuine thought-leaders in the field. We are differentiated by our practical experience of delivering AI centred projects for our clients.

Delivery

The core capability, Filament brings two decades of enterprise application design & build. Design-led & agile, we delight our clients and retain strong relationships.

Education

Filament have created a suite of educational programmes & resources to develop the in-house capability of our clients, launching them as an AI leader in their industry.

Delivery Areas

Chatbots

We're trusted by some of the biggest enterprises worldwide to deliver chatbot capability with their teams.

Computer Vision

Capability to deliver scalable, enterprise-level solutions built on the latest computer vision technology.

Dashboards

A development framework dedicated to knowledge management and decision dashboards.

Custom ML

From detecting emotions in chat messages to assessing drone imaging for damage in industrial equipment, we bottle human expertise into reusable scalable ML models and systems.

AI Solutions

We have built industry focussed solutions powered by AI technologies that have been **conceived from our work with our clients.**

Tools for businesses to build, train, integrate, manage and analyse all of their chatbots capability from a central hub.

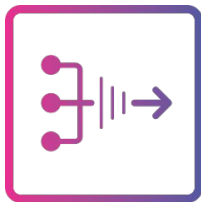

Powered by AI, Analyst Dash delivers the tools that allow financial analysts to detect their unique signals of interest across company data, taxonomies and news events.

ENGINE

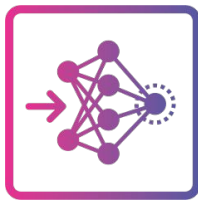

AI SUITE.

Our suite of tooling to train, deploy & scale your AI assets across your business.

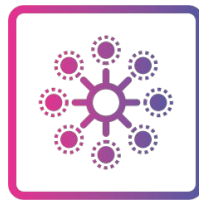

Data Manager

A robust set of tools to ingest, clean and annotate your data ready for model creation.

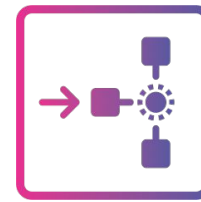

ML Creator

Train Machine Learning models using your data.

Hub

Publish your trained models into a central hub, allowing other users across the business to access and use them.

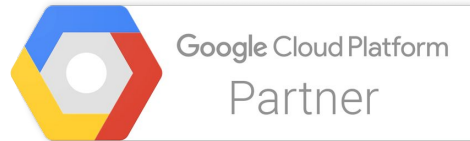

Workflow

Integrate your Engine models, and any other models / third party services into workflows to enhance existing business processes.

Technology partnerships

We have close relationships with the major providers of AI & ML technologies, meaning we can choose the provider or APIs we feel best fit the needs of the brief. By abstracting your asset from any vendor service, we protect you from being locked into one technology.

The logo for Filament AI, featuring a stylized white waveform on the left and right sides of the word "FILAMENT" in a clean, sans-serif font. The background is a blurred image of a computer monitor displaying a software interface with various panels and buttons, overlaid with a purple-to-pink gradient.
